

Thank you for your purchase.

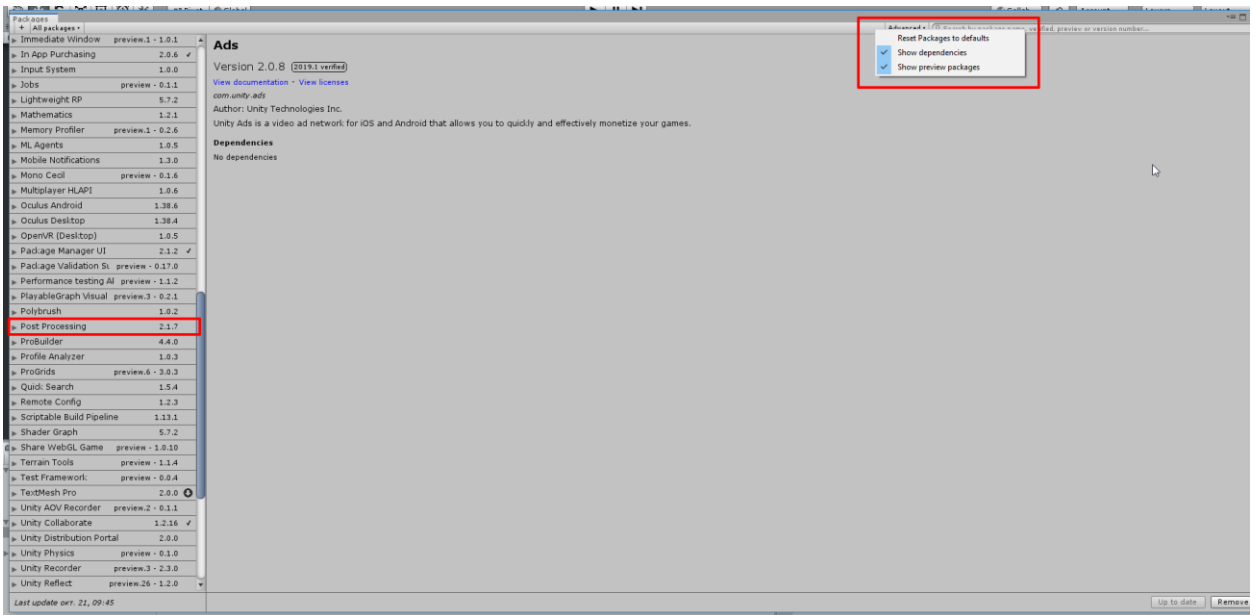

To conveniently collect streets, I can recommend this tool, which is included in unity

Set all the indicators as shown in the screenshot and it will be very convenient to build modular streets
I can recommend this video to you <https://www.youtube.com/watch?v= 29f5HtUyuw>

You will also need to download PP for an exact match with the screenshots from the asset store

If you start having such problems,

```
[11:54:51] NullReferenceException: Object reference not set to an instance of an object
```

you will need to remove post processing from the camera and install it again. Unfortunately, this is a unity error.

HDRP

I attached a package with already configured materials and scenes

<https://www.youtube.com/watch?v=VD5Qr4Rt7-Q&t=385s>

LWRP

I didn't create a separate package for LWRP, but you can easily convert the asset to LWRP using this video. I didn't create a separate package for LWRP, but you can easily convert the asset to LWRP using this video.
